Result dissemination and exploitation / LISAH

Objectives: pooling data and methodological developments

Method: designing and implementing a knowledge management strategy, that includes a data management plan (how are handled generated data during and beyond ALTOS, how are they shared, curated and preserved), and that draws transfer strategy (publication, conferences, workshops, copyrights, training sessions, technical reports, policy brief).

Result dissemination and exploitation / LISAH

Means

- Existing materials in other projects

Partnership

- All

Roadmap

- Management plan to be prepared soon, using existing solutions

- IRD support to be solicited, others (project monitoring) ?
